

DMSBT is a privately owned company focused on delivering innovative technical solutions that help our customers meet their strategic business objectives.

With offices in Australia, New Zealand, Singapore, Malaysia, Hong Kong, India, Thailand and Indonesia and an affiliate network throughout the Asia-Pacific region, DMSBT offers our commercial clients, government and non-government organisations a proven systems integrator and business consultancy with high level expertise, experience and passion. We deliver full-spectrum end-to-end infrastructure security, networking, platforms, software, and bespoke application development services and solutions.

"I've worked with many consultants before and have never had a better experience than with DMSBT. Your team should be congratulated with the excellent customer relationships, and knowledge of the Google Product"

*Peter Munivrana
Project Manager - REA Group*

Since our establishment in 1998, DMSBT has worked hand in hand with our clients to identify, integrate and leverage cutting edge tools and technologies to help realise gains in improving organisational efficiency, enhancing collaboration and knowledge sharing and streamlining operations.

DMSBT has an enviable reputation for meeting diversified and evolving needs with time and cost effective creativity and exceptional quality. Our customers tell us that they keep returning to DMSBT for the company's professionalism, competence and value - qualities they have come to expect!

RESOURCES YOU CAN COUNT ON

Our quality-focused corporate culture attracts the very highest standards of personnel and our ongoing commitment to providing a collegial environment - in which our people can grow professionally and personally - is critical to our ongoing success. In keeping with our commitment to quality in all areas of operation, DMSBT is currently pursuing ISO 9001 certification.

GOOGLE ENTERPRISE PARTNER

In 2006, Google selected DMSBT as a Google Enterprise Partner. Since that time, we have been responsible for some of the largest deployments of Google Enterprise capabilities throughout the Asia-Pacific region, successfully delivering major projects for government, education and commercial clients.

Systems Integration

Getting various different technological platforms to work together is always a challenge and the various data and information contained within each platform is extremely precious.

Business Consulting

Our breadth and depth of experience in all facets of business and technology allow us to offer new and exciting solutions for our clients - if you can imagine it, we can deliver it - within the bounds of physics and reason, of course.

Software Development

Anyone can buy a piece of software off of the shelf. It may suit your needs, but chances are, most of what you are paying for, you'll never need or use.

Working with DMSBT is different.

Contact **DMSBT** to discuss your requirements.
