

Google Mini brings Google search to small business websites or intranets, indexing up to 300,000 documents and delivering secure, accurate results for visitors or internal users. Boost productivity and get real value from your data with the Google Mini.

Google Mini

The Google Mini offers the simplicity and power of Google's universal search technology at a very affordable

price. An integrated hardware and software

solution, the Google Mini offers true plug-and-play installation

Whether you're looking to search your company's internal information or your public website, the Mini has the features you need for your business.

The Google Mini's relevant search results and customisable user interface make it a perfect solution for website search. Integration with Google Sitemaps also makes it easy to submit your website for inclusion in Google.com.au search results.

The Google Mini searches up to 50,000 documents for a competitive price and includes all hardware, software and two years of support. Additional versions search up to 100,000, 200,000 or 300,000 documents. Since upgrading is easy, the Google Mini is ideal for growing organisations.

Search your corporate data and improve employee productivity

-  Relevant and secure search across intranets, file servers, and business applications.
-  Google's world renowned user interface will facilitate adoption in your enterprise.
-  Instant access to corporate information = increased productivity.

Add search to your public website for increased conversion rates and page views

-  End users rely on search to find products and information on your site.
-  When visitors cannot find what they search for, they leave your site.
-  With relevant search results, visitors are more likely to purchase from and return to your website
